FORENSIC ROOT CAUSE ANALYSIS & DELETION AUDIT REPORT

Generated: 2026-10-24 19:52:17 PKT

ROOT CAUSE INVESTIGATION & HOW DELETIONS / MISSES OCCURRED

1. Why Were the 32 Customer Bills Missed in the Ledger (June 22 - 27, 2026)?
CAUSE: During the first week of deployment, initial legacy data was imported or entered using an early POS backend routine where ledger posting was bypassed or encountered errors. Starting June 28, 2026, the sales creation route was updated, and 100% of customer bills created since then have recorded ledger entries without exception.

2. How Did 217 Trashed Bills (ORDER_TRASH) Retain 191 Active Ledger Debits?
CAUSE: When a user clicks "Trash" or when an order is converted in the sales UI, the PATCH endpoint (/api/sales) executes "UPDATE sales SET bill_type = 'ORDER_TRASH'" directly. The software DOES NOT delete or reverse the ledger lines that were created when the order was placed! Consequently, customer ledgers still contain unreversed debit charges.

3. How Were the 19 Sales Hard-Deleted from the Sales Table?
CAUSE: The DELETE endpoint (/api/sales?id=...) permanently removes sales from the database ("tx.sale.delete"). For 5 of these sales (Sales 253, 291, 356, 479, and 6094), related ledger records failed to delete or had mismatched identifiers, leaving permanent "Ghost" ledger entries in customer accounts (e.g. Sale 6094 charging PKR 149,000).

4. Why Are There 509 Deleted Ledger Rows in the Database?
CAUSE: When sales or purchases are hard-deleted, the software runs "tx.ledger.deleteMany({ where: { bill_no } })", leaving permanent primary key gaps in the ledger sequence. Other gaps resulted from Day-End closing recalculations and manual cleanup scripts.

TABLE 1: THE 19 HARD-DELETED SALES (Permanent Gaps in Sales Table)

#	Sale ID	Approx Date	Neighbor Time	Ledger Status	Customer / Account Name	Debit (PKR)	Details / Reconstructed Impact
1	**253**	2026-06-22	19:11 – 19:16	**Ø=Ý4 GHOST LEDGER lines)**	Ameer Hamza pindi dhotra	41,368	Sale Bill - BILL - Customer Account (Debit)
